

Deep Learning

Hindriyanto D. Purnomo, Ph.D

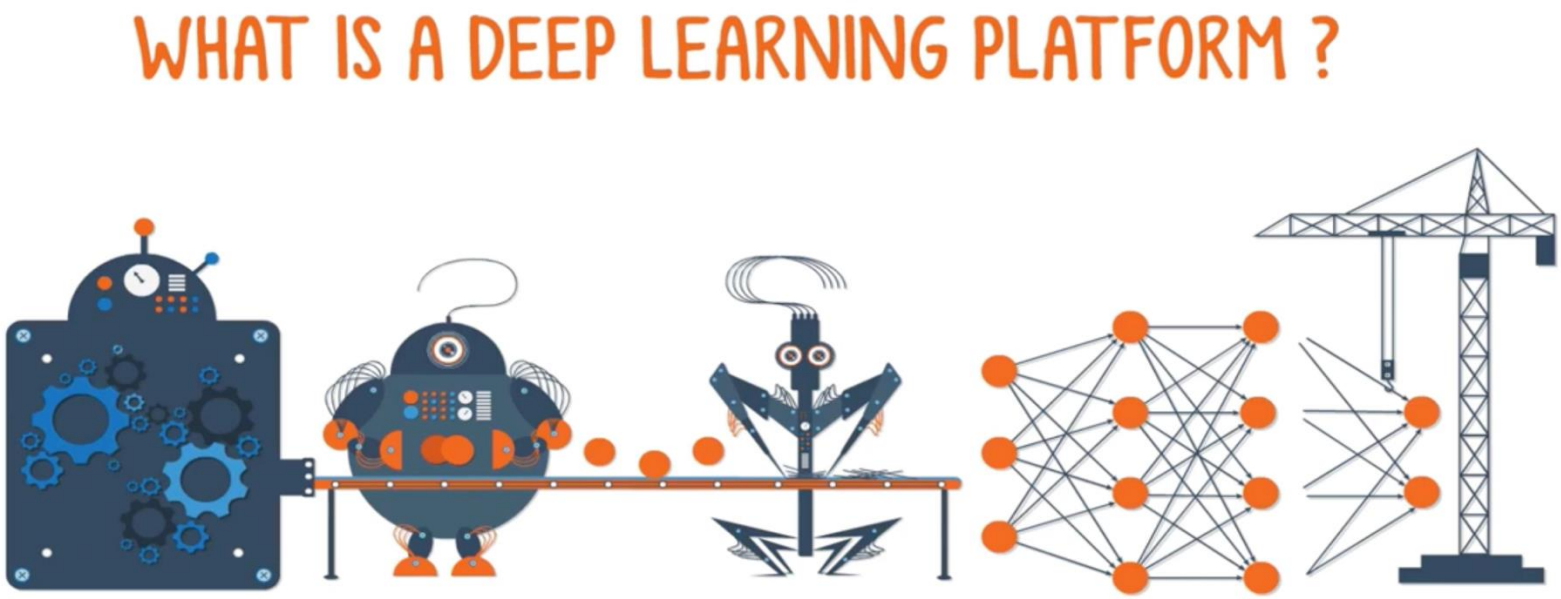

Platform Deep Learning

Materi :

- Cognitiveclass.ai : Deep Learning Fundamentals : module 4(Deep Learning Platforms) https://apps.cognitiveclass.ai/learning/course/course-v1:DeepLearning.TV+ML0115EN+v2.0/home
- module 4

Deep Learning Platform

- Apakah platform?

https://www.youtube.com/watch?v=EzbGiB_6TSI

- Platform adalah *“a set of tools that other people can build on top of”*.

- Contoh : bayangkan aplikasi yang bisa di abngung menggunakan tools yang disediakan iOS dan Android maupun Windows and MacOS

Deep Learning Platform

- Platform Deep Learning adalah serangkaian perangkat yang menyediakan tools dan interface untuk membangun deep neural network.

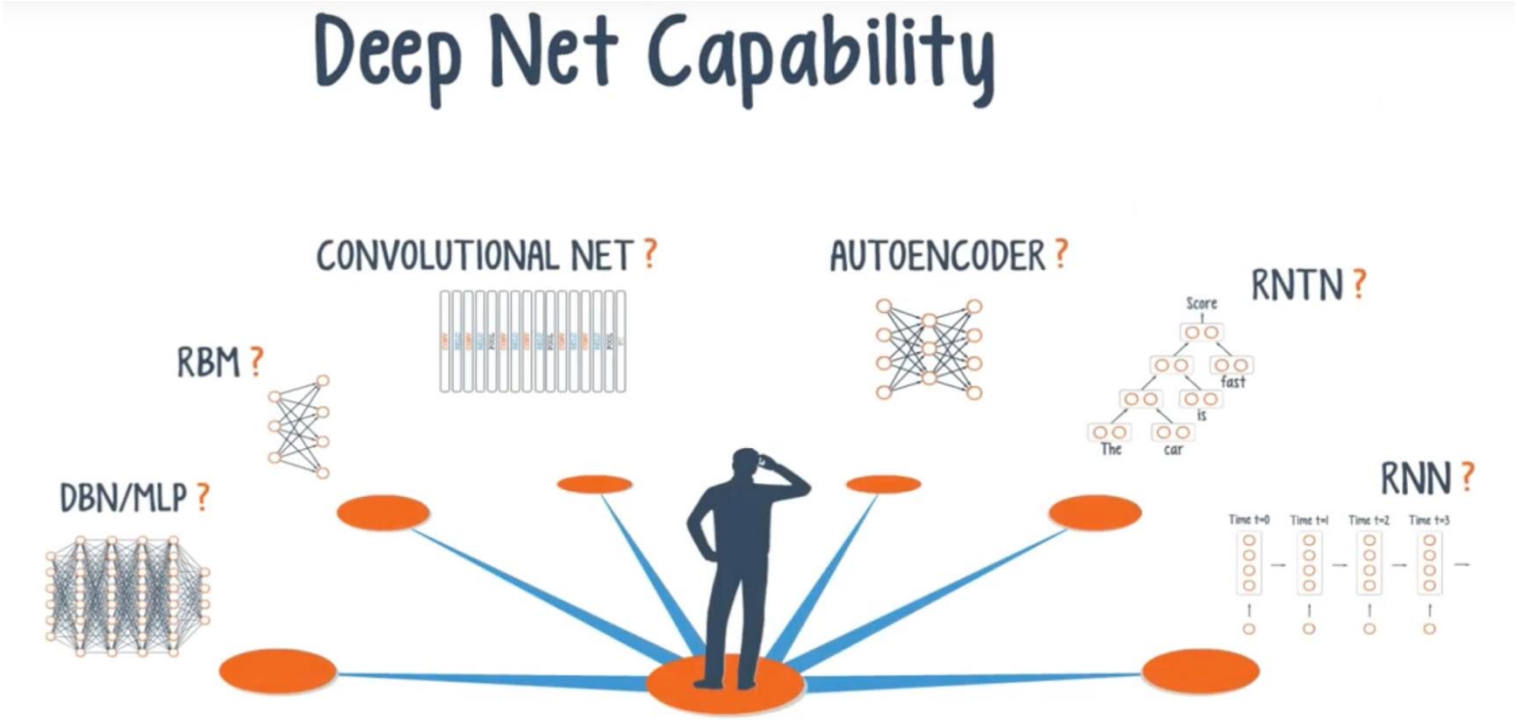

- Deep learning platform terdiri dari : Software Platforms & Full Platforms

Deep Learning Platform

- Deep Net Capability
- Data Mugging
- UI/Model management
- Infrastructure

Deep Learning Platform

- Deep Net Capability : menyediakan berbagai model deep learning

https://www.youtube.com/watch?v=EzbGiB_6TSI

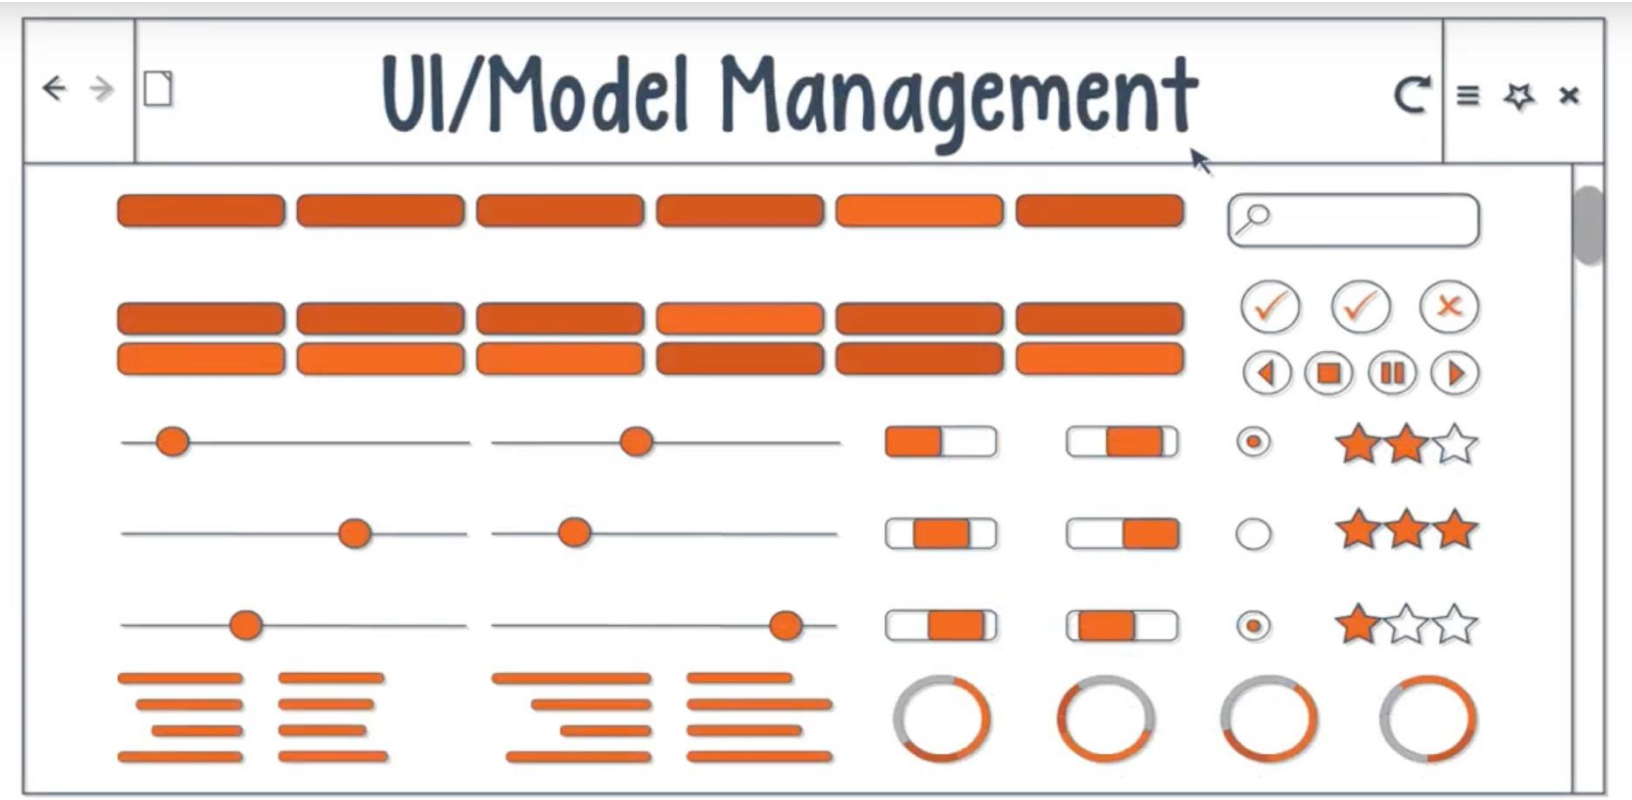

Deep Learning Platform

- Data Mugging : integrasi & pengolahan data

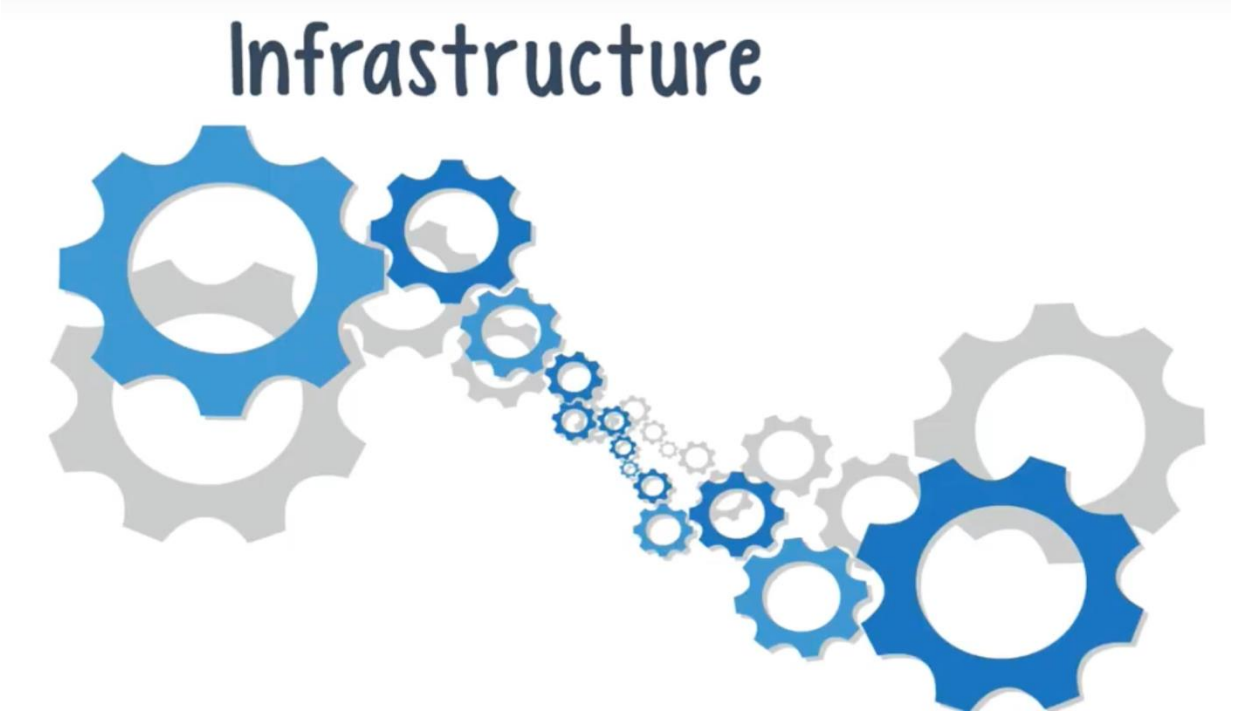

Deep Learning Platform

- UI/Model management : mengelola model

Deep Learning Platform

- Infrastructure : computing resources, training

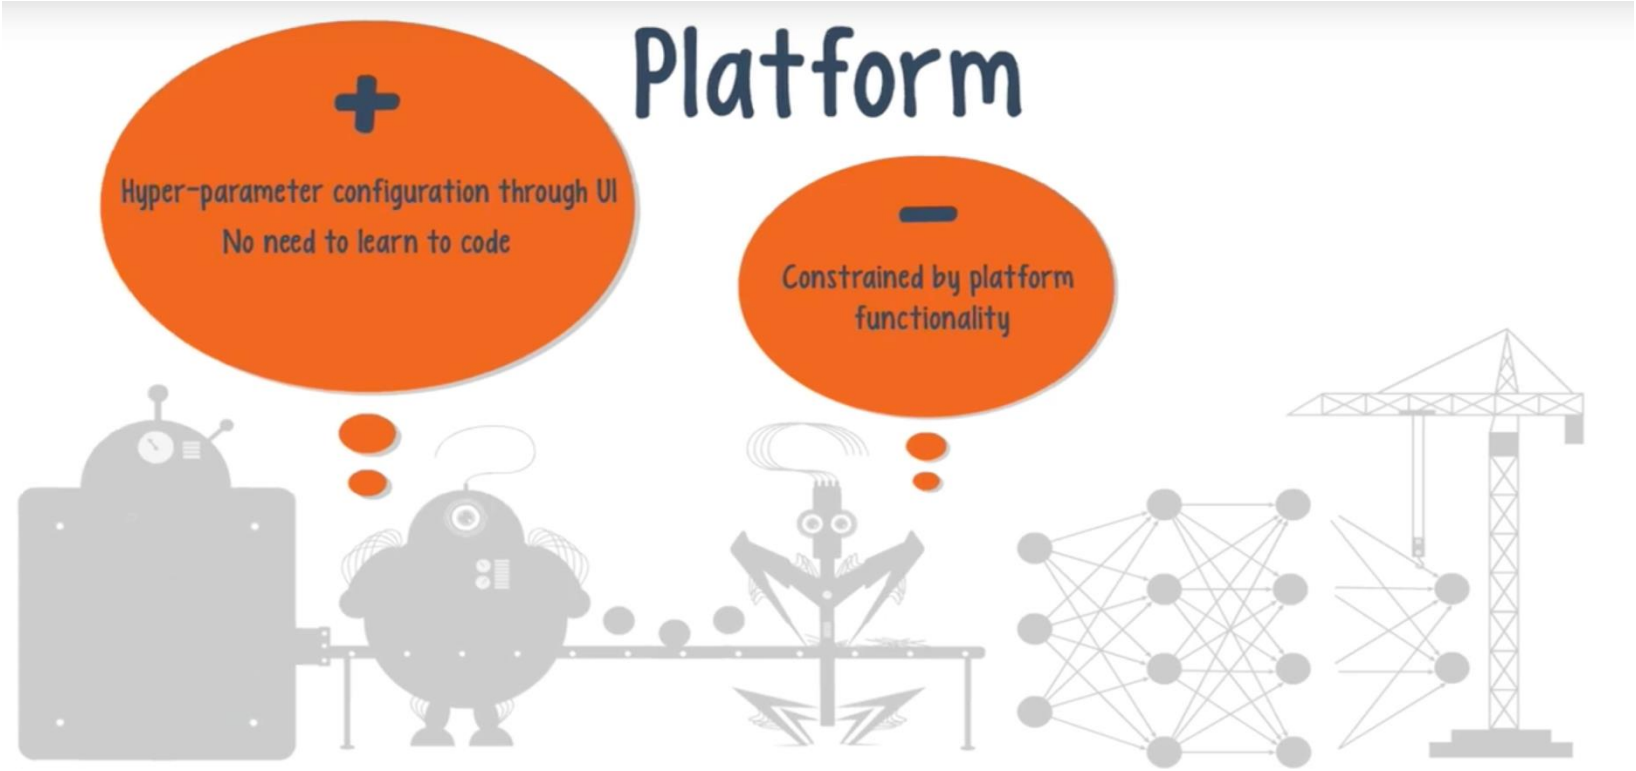

Platform VS Library

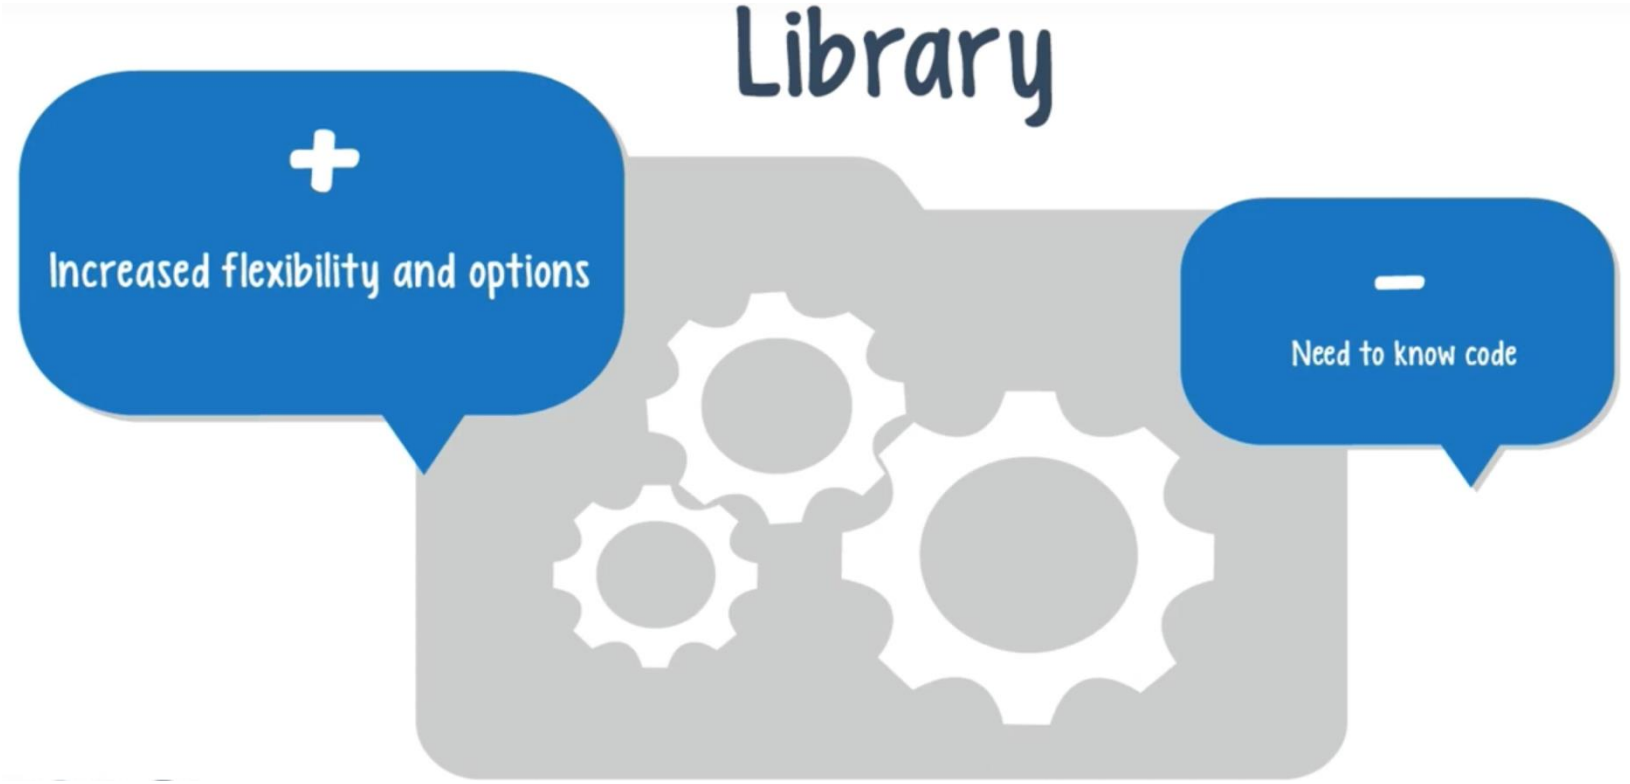

- Platform : aplikasi yang memungkinkan kita mengkonfigurasi hyperparameter deep net’s melalui UI yang intuitive (less/no coding)

- Library : serangkaian fungsi dan modul yang dapat di panggil melalui code untuk melakukan tugas-tugas tertentu

Platform VS Library

Platform VS Library

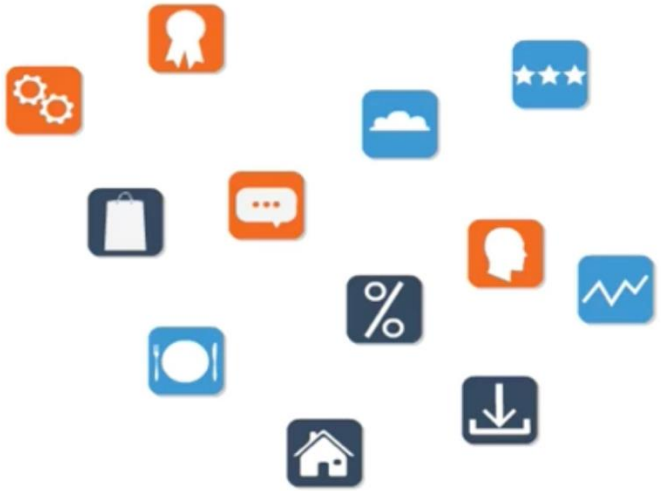

Contoh Deep Nets platforms

Platform VS Library

- Contoh platform : ersatz (full platforms) & H2O.ai (software platforms)

ersatz labs

H2O.ai

Dato

H2O.ai
